	Game Development		
	Mobile App Development		
	Game Design Studio		
	Programming Languages		
	Networking Essentials		
	Intro to Linux		
	Cybersecurity		
	Info Tech 1		

**Career and technical education** (CTE) provides an important pathway to success for high school students and offers each student opportunities to personalize their education based on career interests and unique learning needs. By enrolling in a Career and Technical Education course, students learn the technical applications of many occupations while preparing for higher education or entry-level employment.

# State of Oregon Career Pathways

***Agriculture, Food, and Natural Resources*** courses consist of our Science and Mathematics classes. Some of these classes include Oceans, Forensics, Chemistry, CN Chemistry, AP Biology, and Physics

***Arts, Information and Communication*** courses include Band, Choir, Art, Graphic Design, Electronic Media, Yearbook, Theatre, Spanish, French, Intro to Computer Science, Computer Science (Python), Web Page Design, Game Development, Mobile App Development, Game Design Studio, Programming Languages, Intro to Networking, Intro to Linux, Cybersecurity, and Information Technology

***Business and Management*** has many courses like Computer Technology, Marketing, Business Management, Advanced Business Concepts and Culinary Hospitality

***Health and Biomedical Science*** is a two-year course of study that is designed for people interested in exploring a career in Healthcare upon graduation from high school. Courses include Anatomy/Medical Terminology, Sport Medicine and Wellness Occupations

***Human Resources*** courses include Child Development, Early Childhood Education, AP Psychology, and Teacher Cadet

***Industrial and Engineering Systems*** Beginning Woods, Advanced Woods, Carpentry, Robotics, Basic Manufacturing, and Industry and Engineering

## CLUBS AND ORGANIZATIONS

[illegible]

**CONCERT CHOIR** **051100****Grades 9-12**

Concert Choir is a non-audition group in which beginners are welcome. It is a prerequisite for auditioning into jazz choir. Fees are \$20 a year which covers purchasing music, music binders, and any festival fees. This group performs a range of repertoire including classic choral repertoire and beyond. Choir robes are used so there are no associated wardrobe costs.

**CONCERT BAND** **051020****Grades 9-12**

Concert Band is a non-audition group; however, some experience is suggested. All 9th grade students must take concert band before placing into wind ensemble and/or jazz band. Students in this ensemble perform at pep band games, school concerts, and a few festivals. The cost to rent an instrument is \$75 per year which includes instrument accessories. Percussionists pay a \$30 per year fee for accessories. Pep Band Shirts are \$10 and are only available if joined 1<sup>st</sup> trimester. No festival fees are required for this class, but students are responsible for purchasing their own concert black attire.

**JAZZ BAND** **Teacher placement****Prerequisite: Performance placement required**

Jazz Band performs a wide variety of music from traditional jazz & blues, pep band music (along with concert band & wind ensemble), and music for the annual R&B Show at the Cottage Theatre in February. A minimum of one hour per week of practice at home is required for this group as students will be learning advanced concepts including improvisation. Jazz Band will travel to jazz festivals as well. Fees are \$75 to rent an instrument, \$20 for rhythm section—no additional fees for festivals. Jazz Band students wear traditional concert black (students responsible for their own wardrobe).

**SCHOOL OF ROCK** **051051****Grades 9-12**

Have you seen "School of Rock"? Well that's basically what this class is! Learn to play Guitar, Bass, Drums, Piano, or be the lead singer of a rock band. In this class students form a band, learn some basics, and learn songs together. More experienced students will get to perform in front of the school if they desire. A limited number of instruments will be available to borrow.

**JAZZ CHOIR** **Teacher placement****Prerequisite: Performance placement required**

Jazz Choir is an active choir that performs traditional and modern jazz music. Jazz Choir travels to festivals and also performs in the annual R&B Show at the Cottage Theatre in February. Fees are \$20 per year which includes music, music binders, and all festival fees for the year. New members will need to purchase a blue dress (\$50) or concert black slacks and a blue shirt, black tie, and concert black shoes.

**GRAPHIC DESIGN** **111540****Grades 9-12**

Students explore the tools and world of a graphic designer through projects, guest speakers, field trips and the principles of design. Topics cover designing and creating logos, typography and text effects, print design layouts, editing and retouching images, creating print advertisements, and the use of photos and illustrations in design. Students will gain a basic knowledge of Adobe Photoshop, Illustrator, and InDesign, as well as careers in design.

**FEE: A 2G Flash is required.**

**ELECTRONIC MEDIA 1** **051680****Grades 9-12**

Students in this class will learn the basics of TV and Film Production. You will work in production teams to create short video projects designed to help you learn about the different aspects of filmmaking and TV production. Some of the projects include a movie scene remake where you recreate a scene from a movie shot for shot and another project where you work with actors from our drama classes to create a 30 second TV commercial. In the Spring you will learn how to produce our new show Mane Event. Students will have access to HD cameras, audio equipment, a green screen studio, lights and iMac computers to edit all your work.

**FRENCH 1** **241020****Grades 9-11**

French 1 is a yearlong course for students to begin to learn the language, geography and culture of French speaking countries. Students will be communicating in French by speaking, reading, writing, listening and applying culturally appropriate practices. Students will learn to use French in everyday situations through dialogues, oral presentations, group activities and projects. Active participation will be required for all students to build skills to the necessary proficiency levels for French 2 next year.

**SPANISH 1** **061010****Grades 9-11**

Students are introduced to the Spanish language and culture through music, dance, games, hands-on

projects, paired and group activities. Through speaking, listening, reading and writing activities, students will be able to practice and strengthen their emerging language skills. Students will not only come away with knowledge of basic vocabulary and grammar but also appreciation of Spanish culture and celebrations. Emphasis is on speaking and listening. Completion of homework assignments, projects, and active class participation is expected. This is a yearlong class.

### **THEATER ARTS** **050510**

#### **Grades 9-12**

This is a beginning Theater course for students who have had little or no formal Drama training or experience. It is also a prerequisite course for Advanced Theater. In this class we will study the technique of Robert Cohen who bases his work on the Stanislavsky system of acting. We will also explore improvisation work, physical and vocal warm-ups and theater games. In addition, students will explore aspects of technical theater. Students will be required to read articles relating to theater and write their responses as well as write theatrical reviews. Participation is a major part of the grade.

### **STUDIO ART** **051700**

#### **Grades 9-12**

This is a beginning art course in which students develop a foundation of art skills and techniques. They will express their creativity through a variety of different materials. Areas of study will include ceramics, fibers, painting, drawing, glass fusing, sculpture, and book and paper art. Students will be introduced to the elements and principles of design and art appreciation.

### **COMPUTER TECHNOLOGY** **100040**

#### **Grades 9-12**

This class will enable you to receive CS 120 Concepts of Computing college credit. It will introduce you to Word, Power Point, Excel, Google products, computer basics and networks.

This class is a prerequisite for most college pathways.

### **MARKETING** **121631**

#### **Grades 9-12**

#### ***Offered every other year (Even numbered years)***

This class will include looking at Sports Marketing and its tie to Entertainment and Fashion Marketing. We will look at athletes, teams and leagues, stadiums, arenas and playing facilities, agents, lawyers, promoters and sports marketing/advertising agencies, as well as the media. We will use marketing texts as well as a Virtual Business-Sports simulation game. We will use the Internet and

articles to give us current information and we will incorporate a professional sporting event to get the real feel for sports marketing.

### **BUSINESS/MANAGEMENT** **NOT OFFERED**

#### **Grades 9-12**

#### ***Offered every other year (Odd numbered years)***

A survey course covering basic concepts and language of business, including the functional areas of business; management, marketing, accounting and finance, and human resource management; and the legal environment.

#### **LEARNING OUTCOMES**

At the conclusion of this course, the student should be able to:

- Explain key business activities (i.e. accounting, finance, marketing, operations, etc.) and the primary concepts and terms associated with these activities.
- Describe how business interacts with the external environment and how this interaction impacts both business and the external environment.
- Describe the financial, legal, and administrative procedures involved in starting a new business venture.
- Identify ethical issues facing businesses.
- Explain current business news from the perspective of different business disciplines

### **FOODS** **222020**

#### **Grades 9-12**

Fill your fall with the flavors of baked goods. Do you think you want to be a chef? Start now. Basic Foods introduces safety and sanitation, math skills, basic science, nutrition principles and the development of knowledge and skills involved in food preparation. Students will work cooperatively in baking labs relating to quick breads and yeast breads. Students have the opportunity to study for and take the Oregon Food Handlers Test as a part of the course, which is necessary for anyone pursuing a food service job. Desserts, Desserts, Desserts. Are you interested in a culinary career? Learning how to improve on the presentation of food will really come in handy. In this course dessert techniques will be introduced. Production, presentation, time management and professionalism are emphasized. Students will practice piecrust preparation, various pies, various cake techniques, and cake decorating. Students will be involved in culinary career exploration and incorporate technology in several projects. You will also learn about American Heritage

and then prepare and taste regional dishes. We research recipes and then try them out in the class. Every year is something new and interesting- and usually tastes good too. Global Foods covers social studies information and then applies it in cooking labs. Students will be introduced to history, geography, customs and foods of the United States and various international countries. This class provides students with the opportunity to dream about travel to faraway places and broaden their horizons in tasting new and interesting foods.

### **BEGINNING WOODS 170060**

#### **Grades 9-12**

Beginning Woods is for students who have never taken a wood shop class. During the year, you will learn how to use all the equipment in a proper and safe manner. While learning to use the equipment, you will build approximately 7 projects. Some of the projects are a shelf, cutting board, box, nightstand, bookcase, and other items. Each project will introduce new skills and procedures designed to prepare you for Advanced Woods. **Fees: Students are expected to pay for their own project costs plus a \$10 fee per trimester**

### **Robotics 210090**

#### **Grades 9-12**

In this course, the student will be introduced to robotics programming and design using various robots including sphero, storm, and VEX. This is a hands-on class where students will get to learn while they play with robots. Experimentation is encouraged! The students will control their robot through a series of challenges while learning to program. After completion of the required course material students will have time for personal challenges. **Fees: \$10 per term due at the beginning of each trimester totaling \$30 per year**

### **Basic Manufacturing 130020**

#### **Grades 9-12**

In this course, the student will cover the basics of using CAD (computer aided design) in fabrication. The students will design and print vinyl stickers, use a laser cutter, and a 3D printer. After completion of the required course material students will have time for personal creations. **Fees: \$10 per term due at the beginning of each trimester totaling \$30 per year**

### **INTRO TO COMPUTER SCIENCE 100120**

#### **Grades 9-12**

This course provides an introduction to the world of computer science. Students will learn the basics of web design, game design, and programming in

Python as well get an overview of the careers that involve computer science thinking. The course will also include an exploration of the impact of computers and the internet on individuals and society, as well as the ethical and social issues related to computing. Students will learn how computers work internally and how they represent numbers and data. Students who successfully complete the course requirements may receive credits from LCC for CS 160 - Orientation to Computer Science.

### **WEB PAGE DESIGN 102010**

#### **Grades 9-12**

**Prerequisite: Intro to Computer Science completed or taken concurrently**

This is a project-based course that teaches students how to build their own web pages. Students will learn the languages HTML and CSS, and will create their own live homepages to serve as portfolios of their creations. Students will finish this course with tangible, professional, mobile responsive websites.

### **GAME DEVELOPMENT 101601**

#### **Grades 9-12**

**Prerequisite: Intro to Computer Science completed or taken concurrently**

This course is an introduction to the field of game development. It includes a survey of computer game categories and platforms, an overview of the game design and development process, and an introduction to tools used for graphics development and game development. Students who successfully complete the course requirements may receive credits from LCC for CIS 125G - Beginning Game Development.

### **MOBILE APP DEVELOPMENT 102060**

#### **Grades 9-12**

**Prerequisite: Intro to Computer Science completed or taken concurrently**

This course provides students who have no programming background with an introduction to application development. Students will use a visual, drag and drop tool to build applications for the web and will be introduced to fundamental programming concepts and skills in the process. Students who successfully complete the course requirements may receive credits from LCC for CIS 125A - Software Tools: App Development.

**CHILD DEVELOPMENT****190520****Grades 9-12**

This is a class that everyone would benefit from. Great class discussions, research on the latest information, videos and applied projects. This class forces you to think about your own childhood and how you would want to influence future generations. This class qualifies for college credits at LCC. Students will learn about various stages of growth, labor, birth and birth defects, nutrition, health and safety, guidance techniques, theory, teaching and parenting skills, various forms of abuse and communication techniques.
