Prior Notice of Special Education Action

Date: 09/16/2010

Dear **Parent**

This notice informs you of the following action:

Change of **Student** status to that of regular education student. He will not currently be served under an IEP.

which is a **proposal to change** the following aspect of **Student's** special education:

- ☒ Identification
- ☒ Placement (other than initial placement)
- ☒ Provision of a free, appropriate public education (includes IEP)

This action is proposed because:

Student's parent has enrolled him in an online charter school. **Student** remains eligible to receive special education services as outlined in his IEP. These services may be accessed at an elementary school in South Lane School District. At this time, **Student's** parent has opted not to access the offered IEP services in one of the district's public school settings.

This action is based on the following evaluation procedures, tests, records, or reports:

Parent decision

Other options we considered were:

Continuing IEP services.

We rejected these options because:

Parent does not wish to access services at this time. Instead, she is opting for **Student** to participate solely in an online charter school program.

Any other factors considered by the team:

Student remains eligible to receive special education services. Should his parent decide to pursue IEP services in the future, she may contact South Lane School District in order to make such arrangements.

Sincerely,

Name: David Bascue
